ABOUT ME

Second-year Computer Science and Engineering student specializing in Artificial Intelligence, interested in creating websites and software applications. Enjoys learning programming and exploring new technical tools and technologies. Actively participates in hackathons and other technical events. Has experience creating various UI designs and other design projects using Figma.

EXPERIENCE

- **Smart India Hackathon 2026:** Built a dual-tunnel secure proxy with end-to-end encryption and rotating credentials for government websites.
- **Flipkart Gridlock Hackathon 2.0:** Trained an AI regression model to predict city traffic.
- **SPIN HACK 2.0:** Built a website for a mobile phone brand.
- **RedRob India Hackathon:** Built an extension to RedRob's AI that plans and guides student learning paths.
- **Vibe Coding Hackathon, GDGC MBCET:** Built a stock price analyser model.

PROJECTS

CineBook: Movie Ticket Booking System

Built a movie ticket booking system in Java. Implemented per-screen seat maps across 4 theatres in 2 cities, wallet-based payments, separate admin and customer roles, and PDF ticket generation with QR codes.

Java · SQL

BQuick: Typing Trainer

Built a typing trainer using Claude Code that times every keystroke to find and drill a user's weakest key transitions. Added a custom practice tab for typing and learning any text, and programming drills that build code-typing speed.

Student Performance Analyser

Built a marks analysis tool in Python using pandas. Implemented per-exam ranking, cross-student comparison, and tracking of a student's performance against their own previous results.

Python · pandas

Citizen-Police Reporting App

Designed an 8-screen mobile app prototype in Figma addressing citizen-police communication gaps, letting users report issues and receive actionable guidance. Built as an impact project for Mulearn.
